REVIVE

Industrial Transition

Challenge

Depopulation

Low economic
dynamism

Poor
digitalization

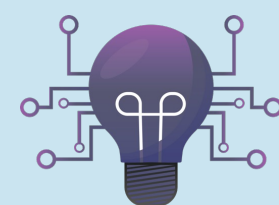

Lack of job

Limited
collaboration

Main goal

REVIVE aims to define **innovative solutions** for a sustainable **economic development** in rural Mediterranean areas, accelerating the transition towards more competitive, sustainable, and resilient ecosystems

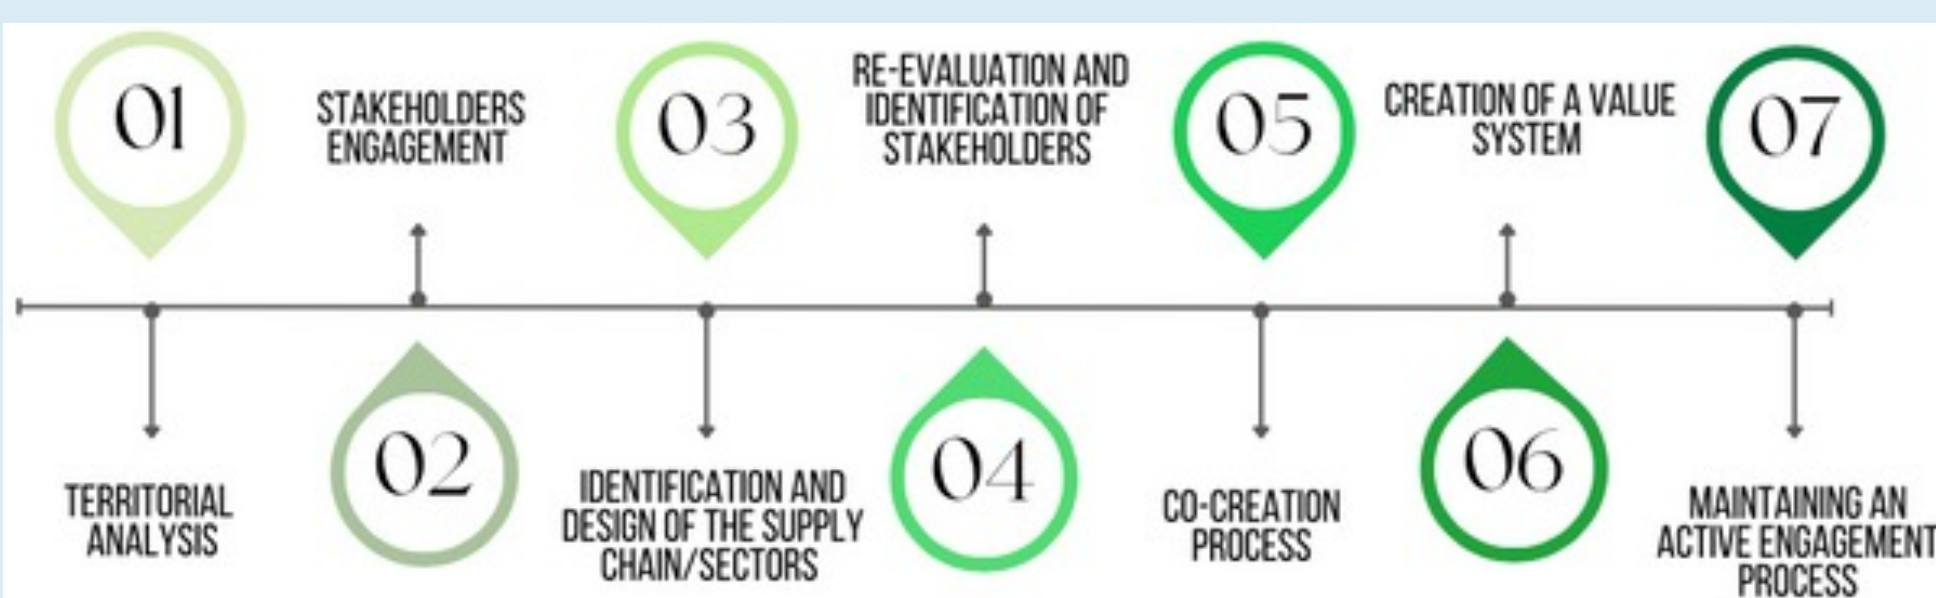

Project outputs

- *REVIVE Territorial Business Model Framework.*
- *Community based innovative business models established and functioning.*
- *7 pilot solutions tested with advanced technologies.*
- *REVIVE transnational cluster of innovative community cooperatives.*
- *MED Digital Innovation Hub Online Platform*

Approach and regional scope

REVIVE is implemented through a **participatory** and **co-design approach**, creating innovative cooperatives that develop interconnected products and services to strengthen economic activities. Communities are also supported through **the enhancement of digital skills** necessary for the adoption of advanced technologies.

Main achievements

- Establishment of 7 Innovative Community Cooperatives aimed at improving the competitiveness and attractiveness of inland areas.
- Development of innovative services and introduction of advanced technologies aimed at promoting internal territories and adding value to products/services.
- Improved cooperation between stakeholders to exchange knowledge and practices and to develop and implement sustainable and innovative solutions to revitalise the economies of the Euro-Med internal areas.

Conclusion

REVIVE promotes sustainable, inclusive business models that enhance local resources, foster regional development, improve services, strengthen social cohesion, and drive innovation and competitiveness creating new green jobs.
